□ Big Picture — How the Business Looks Right Now

The business is facing significant challenges with profitability and cash flow. While sales showed some positive momentum in February and March, April saw a dramatic downturn with a massive loss of over 602 million rupees. Cash flow from operations has been inconsistent, and the company is struggling with high costs relative to sales revenue.

□ GREEN FLAG BOX — What's Working Well:

- □ February and March showed improved sales performance
- □ Some months demonstrated better working capital management
- □ Non-current investments remain stable at 133 million rupees

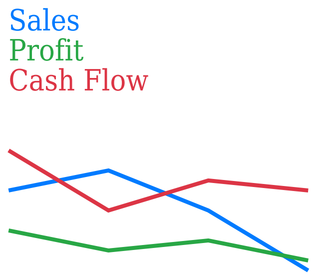
□ RED FLAG BOX — What Needs Attention:

- ⚠ Massive losses in April (602 million rupees)
- ⚠ Negative gross margins throughout the period
- ⚠ Cash flow from operations negative in most months

Overall Health Gauge

□ Critical

Sales-Profit-Cash Trend



CFO Advice:

"The business is in critical condition with massive losses. Immediate focus should be on cost reduction and reviewing pricing strategy. Stop the bleeding before pursuing growth."

Profit Power — The Earning Engine

Your profit engine is currently broken. The business is consistently selling products for less than they cost to produce, with gross margins deeply negative across all months. April was particularly devastating with costs exceeding sales by 60%. Operating expenses are relatively stable, but the core issue is that you're not covering your basic product costs.

Sales → Profit Waterfall

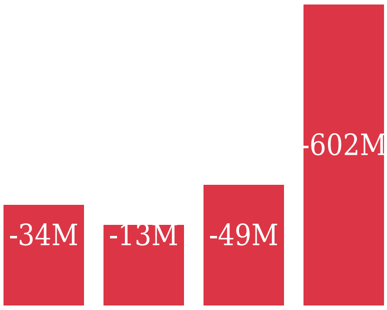
Monthly Profit/Loss Trend



CFO Advice:

"Stop selling products that cost more than they earn. Review your entire product pricing and cost structure. Consider discontinuing unprofitable lines until you can fix the cost-price relationship."
