

1. Liquidity Analysis

Current ratio improved from 1.16 (04/30/2024) to 1.15 (05/31/2024) as current assets decreased from ₹1,314,465,308.33 to ₹1,048,099,415.52 while current liabilities reduced from ₹1,129,984,168.41 to ₹910,113,204.75. Quick ratio declined from 0.66 to 0.54 due to reduced accounts receivable (₹501,902,887.08 to ₹261,552,637.73) and cash balances (₹219,630,140.50 to ₹217,143,682.86), with inventory remaining substantial at ₹540,343,306.63. Working capital decreased from ₹184,481,139.92 to ₹137,986,210.77, indicating reduced short-term financial flexibility. Cash conversion cycle components show high inventory levels and reduced receivables, suggesting potential collection efficiency improvements needed.

2. Leverage & Solvency Analysis

Debt-to-equity ratio improved from 8.35 (04/30/2024) to 6.84 (05/31/2024) as total liabilities decreased from ₹1,648,154,985.84 to ₹1,375,785,890.96 while equity increased from ₹197,390,845.42 to ₹201,265,389.74. Debt-to-assets ratio declined from 0.89 to 0.87, indicating reduced reliance on debt financing. Interest coverage ratio cannot be calculated due to unavailable EBIT data. Long-term debt to total capital decreased from 72.4% to 69.8%, showing improved capital structure stability. Fixed charge coverage ratio data unavailable. The company maintains significant borrowing capacity with secured long-term borrowings of ₹359,612,195.72 and unsecured long-term borrowings of ₹106,060,490.49.

3. Asset Efficiency Analysis

Total asset turnover cannot be calculated without revenue data. Fixed asset turnover data unavailable. Inventory turnover ratio cannot be computed due to missing cost of goods sold. Accounts receivable turnover data unavailable. Days sales outstanding cannot be calculated. Working capital turnover data unavailable. The asset composition shows current assets representing 66.5% of total assets (₹1,048,099,415.52/₹1,577,051,280.70) with significant inventory (51.6% of current assets) and accounts receivable (25.0% of current assets). Non-current assets decreased slightly from ₹531,080,522.93 to ₹528,951,865.18, primarily in fixed assets (₹396,417,259.28 to ₹394,288,601.53).

4. Capital Structure Analysis

Equity proportion increased from 10.7% to 12.8% of total capital, while debt proportion decreased from 89.3% to 87.2%. The capital structure shows heavy reliance on debt financing, with current liabilities comprising 66.1% of total liabilities (₹910,113,204.75/₹1,375,785,890.96). Retained earnings increased through current year profit accumulation (₹5,117,212.44). Weighted average cost of capital cannot be calculated without cost of debt and equity data. The company maintains no preferred stock and has consistent equity share capital of ₹116,348,728.43. Financial leverage decreased from 9.35 to 7.84, indicating reduced risk profile.

5. Balance Sheet Quality Metrics

Balance sheet integrity is confirmed with total assets equaling total equity and liabilities (₹1,577,051,280.70). Current ratio of 1.15 indicates adequate short-term liquidity. Debt composition shows 33.9% long-term liabilities and 66.1% current liabilities. Asset quality appears reasonable with 33.5% in fixed assets and investments. Contingent liabilities data unavailable. Off-balance sheet items data unavailable. The balance sheet shows consistent accounting treatment with deferred tax assets (₹1,205,405.25) and no deferred tax liabilities. No significant unusual items noted beyond normal business operations.
